

# Rolac. Latin American and Caribbean Region

## Countries underrepresented

Caribe; In Latin America: Peru, Bolivia, Paraguay, Central America.

Nobody knows Twas in these regions, visibility problem, connect ourselves and promote symposiums to put us together (workshops, technical seminars)

Meetings in under represented regions.

Search for the researchers who are doing frontiers science in these underdeveloped countries. We, as TYAN, should look for and find researchers from these countries and write them inviting them to apply.

One of the 5 could be from those all the Twas members vote.

Now the selection is done this way: The best voted from each country. 5 different countries. In the case that they receive only from 4 countries, then they can have 2 from the same country. More then ideally, two woman.

Increase the representation of woman in the Academies.

Share the idea of the stuff that we do in Twas to everybody we know. Put the logo of Tyas in the conferences to increase curiosity.

Prizes: to attract attention (e.g. achievements of science). Communication of the opportunities. Marketing for the Prizes.

Honourable Mentions (5-10): without spending money.

Visibility

### **Local problems in our network**

Create a consortium network and specific courses in different regions, to address the local issues and propose solutions “Visibility to amplify the network.”

**Mentoring programs:** strategies for career development
